CURRICULUM VITAE

Andres Mena

PhD Economist · Econometrics · Causal Inference

Seattle, Washington · asebamena@gmail.com
GitHub · LinkedIn · Google Scholar

Experience

Amazon — Economist II, Prime Economics

June 2026–present · Seattle, Washington

Develop econometric solutions for causal inference and economic modeling to inform large-scale investment decisions and strategic decision-making across products.

LAPDE — Co-Founder & Research Director

November 2020–present · Tucumán, Argentina

Lead applied development-economics research, policy analysis, and advisory work for NGOs and government institutions. Design research agendas and translate empirical findings into actionable insights.

Amazon — Economist Intern

June–September 2025 · New York

Designed causal-inference frameworks to evaluate organizational policies and operational performance. Integrated econometric models into tools supporting large-scale decision-making.

Amazon — Economist Intern

September–December 2024 · New York

Developed a semiparametric instrumental-variables estimator for randomized supply-chain experiments with imperfect compliance and ratio metrics, incorporating high-dimensional covariates and Double Machine Learning.

Microsoft — Research Intern

May–August 2024 · Redmond, Washington

Developed a constrained synthetic-control estimator incorporating economic theory into causal inference and applied it to cloud-computing demand and price-elasticity estimation.

IDB Invest — Consultant, Development Effectiveness

April 2018–April 2020 · Part-time

Impact evaluation and causal-inference research on firm productivity in Latin America.

Education

Brown University — PhD in Economics

2021–2026

Thesis: Essays in Econometrics for Causal Inference

Universidad Nacional de Tucumán — PhD in Philosophy

2016–2021

Thesis: Economic Thought and Development in Latin America

Brown University — MA in Economics

2023

Universidad de San Andrés — MA in Economics

2017–2018

Thesis: The Impact of Quality Certifications on Firm Performance

Universidad Nacional de Tucumán — BA in Economics

2010–2015

Thesis: Can Studying Economics Make People Selfish? Evidence from a Classroom Experiment

Working papers

- Semiparametric Instrumental Variable Estimator for Ratio and Level Metrics
- Distributional Policy Learning via Influence Functions

- Synthetic Control Estimation Under Economic and Statistical Constraints
- Double Debiased Machine Learning for Fuzzy Differences in Differences
- High Wage Collective Bargaining Units: The Effect of Unions on Firm Pay and Inequality

Publications

Montes-Rojas, G., & Mena, A. S. "Density estimation using bootstrap quantile variance and quantile-mean covariance." *Communications in Statistics – Simulation and Computation*, 52(4), 1449–1461, 2023 (online 2021).

Danón, A., Mena, A. S., & Ramasco, A. "COVID-19 a nivel local: SEIR+ un modelo para proyectar escenarios epidemiológicos y demandas hacia el sistema sanitario." *Ensayos de Política Económica*, 3(3), 1–24, 2021.

Teaching

Lecturer / Instructor — Universidad Nacional de Tucumán

- Causal Inference Using Machine Learning — graduate, 2024
- Macroeconomics I — undergraduate
- Macroeconomics II — undergraduate

Teaching Assistant

- Brown University: Applied Econometrics I (Toru Kitagawa); Applied Econometrics II (Peter Hull); Theory of Market Design (Bobby Pakzad-Hurson).
- Universidad de San Andrés: Macroeconomics for Business — MBA (José Fanelli).
- Universidad Nacional de Tucumán: Macroeconomics.

Research assistance

Brown University: Jonathan Roth, Susanne Schennach, and Neil Thakral. Work in econometrics, inference, and allocation simulation.

Selected awards

- Statistics & Experimentation Best Paper Award — Amazon Consumer Science Summit, 2025.
- Best Conference Poster — Argentinean Statistical Society, 2019.

Methods & tools

Causal inference, econometrics, experimental design, policy learning, Difference-in-Differences, synthetic control, instrumental variables, and causal machine learning.

Python · R · Stata · SQL · AWS · Azure · Git

Updated October 2026.
